EDUCATION

University of Florida

Bachelor of Science in Computer Science

Gainesville, FL

May 2028 | GPA: 3.88

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Software Engineering, Databases
- Minors/Certificates: Statistics Minor, GIS Certificate

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL, Go, PHP

Frameworks: Spring Boot, Express, React.js, Next.js, React Native

Libraries: pandas, NumPy, xarray, Rasterio, GeoPandas, Matplotlib, sqlalchemy

Tools/Technologies: Git, Linux, Docker, PostgreSQL, MariaDB, AWS, GCP, MongoDB

EXPERIENCE

Software Engineering Intern | Sola Fide Inc.

Apr. 2026 – Present

- Developed PHP/MariaDB backend systems for a global E-commerce platform serving **100K+ users**
- Migrated and integrated production infrastructure onto a modern Linux-based AWS environment (EC2, Route 53, S3, CloudFront), debugging deployment and maintaining **99.9% uptime**
- Deployed ACME-based SSL/TLS automation reducing certificate management overhead by **80%**

Undergraduate Research Assistant | University of Florida

Mar. 2025 – Present

- Engineered automated Python ETL pipelines using Pandas, NumPy, xarray, and scikit-learn to process and transform **1M+ records** across large-scale environmental and agricultural datasets
- Developed reusable preprocessing and feature-engineering workflows, reducing end-to-end processing time by **87% (8 hrs → 1 hr)** and enabling scalable batch analytics
- Optimized data-processing pipelines through spatial indexing, vectorized operations, caching, and automated validation, accelerating analyses across **4,000+ locations** and improving reproducibility across 50+ datasets

Co-Founder & Full Stack Developer | FavorIt

Apr. 2025 – Dec. 2025

- Developed and shipped a multi-service iOS application serving **1K+ users** and **500+ monthly transactions**
- Engineered event-driven Firebase/Firestore backend infrastructure for real-time tracking, authentication, and transactional data pipelines, sustaining **99.9% uptime** across 200+ concurrent active sessions
- Led full product lifecycle from MVP architecture to production deployment, managing Agile sprint planning, GitHub code reviews, CI/CD workflows, and feature releases for a 5-person engineering team

Backend Developer - Team Tech | Society of Women Engineers

Jan. 2025 – Apr. 2025

- Engineered Java-based Spring Boot backend services for a CACI-funded aerospace application, utilizing Orekit to perform satellite orbit propagation and trajectory calculations
- Architected RESTful APIs and MongoDB-backed data pipelines for real-time orbital visualization, reducing frontend computational overhead by **25%** and improving system responsiveness
- Delivered a full-stack prototype within a 6-member Agile team over a 10-week development cycle

PROJECTS

AI Feedback Dashboard | Go, PostgreSQL, Docker, Gemini API, GCP Cloud Run

June 2026 – Present

- Built a Go-based feedback analytics dashboard with PostgreSQL, transforming **1K+ feedback records** into a searchable knowledge base reducing debrief review time by **~90%**
- Built source-cited question answering over four years of structured and unstructured feedback
- Containerized and deployed the application to Google Cloud Run with Docker, implementing type-safe SQL with sqlalchemy, transactional imports, versioned database migrations, and GCP Secret Manager

Cooked | React, TypeScript, Express, Supabase, PostgreSQL, Gemini API

Jan. 2026 – Apr. 2026

- Developed a meal-planning platform for pantry management, nutrition, and AI-powered recipe generation
- Implemented secure multi-tenant PostgreSQL schemas with Row-Level Security (RLS) and built REST APIs integrating Gemini and USDA FoodData Central to automate feature workflows

LEADERSHIP

Secretary | Society of Asian Scientists and Engineers

Apr. 2026 – Present

- Serve as 1 of 6 Executive Board members, interviewing **80+ applicants** and coordinating board operations, communications, and logistics across a **26-member board** serving **800+ members**
- Increased alumni networking event attendance by **185%**, securing **30+ alumni speakers** and presenting recurring GBM Alumni Spotlights to 200+ attendees

Outreach Director | UF Lion Dance Team

Aug. 2025 – Present

- Secured **\$2,000+** in sponsorships by establishing 20+ community and university partnerships
- Coordinated and choreographed 30+ performances for a 20+ member team, performed for 1,500+ attendees
