EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Computer Science, Minor in Statistics

May 2028 | GPA: 3.9

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Software Engineering, Databases

EXPERIENCE

Software Engineering Undergraduate Researcher | UF CISE - HireGator

Aug. 2026 – Present

- Building a configurable AI interview platform supporting simulations and feedback across professional fields
- Migrating AI and backend services to Google Cloud to scale toward **2,000+** UF users
- Expanding the platform to support the UF College of Pharmacy, translating user feedback into new features

Software Engineering Intern | Sola Fide Inc.

June 2026 – Aug. 2026

- Developed PHP/MariaDB backend systems for a global payment platform handling **1M+** secure transactions
- Migrated a production PHP/Linux server to AWS EC2 to replace the legacy server in production
- Automated SSL/TLS certificate renewal, reducing certificate management overhead by **80%**

Undergraduate Research Assistant | University of Florida

Mar. 2025 – Aug. 2026

- Engineered automated Python ETL pipelines to process **1M+ records** across large-scale datasets
- Built reusable preprocessing workflows, reducing end-to-end processing time by **87% (8 hrs → 1 hr)**
- Optimized pipelines with spatial indexing, vectorization, and caching across 4,000+ locations and 50+ datasets

Co-Founder & Full Stack Developer | FavorIt

Apr. 2025 – Dec. 2025

- Shipped a multi-service iOS application serving **1K+ users** and **500+ monthly transactions**
- Engineered event-driven Firebase/Firestore backend infrastructure across 200+ concurrent active sessions
- Led full product lifecycle from MVP architecture to production deployment for a 5-person engineering team

Backend Developer - Team Tech | Society of Women Engineers

Jan. 2025 – Apr. 2025

- Engineered Java-based Spring Boot backend services for a CACI-funded aerospace application
- Architected RESTful APIs and MongoDB-backed data pipelines for real-time orbital visualization
- Delivered a full-stack prototype within a 6-member Agile team over a 10-week development cycle

PROJECTS

AI Feedback Dashboard | Go, PostgreSQL, Docker, Gemini API, GCP Cloud Run

Jun. 2026 – Present

- Built a searchable dashboard for **1K+ feedback records**, reducing debrief review time by **~90%**
- Designed source-cited question answering over four years of structured and unstructured feedback
- Containerized and deployed to Google Cloud Run with Docker and sqlc

GatorForm | TypeScript, Chrome Extensions API, Google Sheets API

Jul. 2026 – Sep. 2026

- Developed a Chrome extension automating **30+ fields**, cutting form completion by **90% (20 → 2 min)**
- Implemented DOM-based field mapping and Google Sheets API sync across multiple event forms

LEADERSHIP

Secretary | Society of Asian Scientists and Engineers

Apr. 2026 – Present

- Lead board operations for a 26-member board serving 800+ members; interviewed 80+ applicants
- Increased alumni event attendance by **185%** and recruited **30+ alumni speakers**

Outreach Director | UF Lion Dance Team

Aug. 2025 – Present

- Secured **\$2,000+** in sponsorships by establishing 20+ community and university partnerships
- Coordinated and choreographed 30+ performances for a 20+ member team, performed for 1,500+ attendees

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, SQL, Go, MATLAB, PHP

Frameworks: Spring Boot, Express, React.js, Next.js, React Native

Libraries: pandas, NumPy, xarray, Rasterio, GeoPandas, Matplotlib, sqlc

Tools/Technologies: Git, Linux, Docker, PostgreSQL, MariaDB, AWS, GCP, MongoDB
